

## SEO Assessment

**Keyword tracking:** We noticed growth in the last month. The average position grew from 32.67 to 28.3. There is little down on the last day of the measuring cycle but fluctuations are natural in SEO.

There are still no keywords in the top 3 and only 4 keywords in the top 10. The Top 10 search results are the most important and this is what we will concentrate. Top 10 means that your website is on the first page of Google Search results.

### CURRENT SEARCH RESULT RANKINGS ?

We will be adding keywords during the SEO process as website content will also developed.

# SEO Assessment

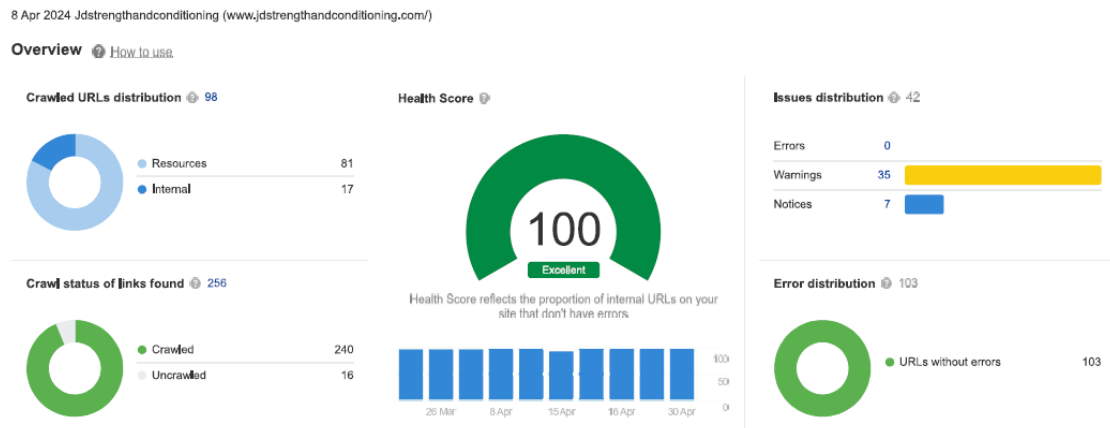

## Backlinks

We started link-building to your website. The backlinks will appear in the “backlink monitor” when they are indexed by Google, which usually takes from a few weeks to even a few months.

We will make a backlink audit in the next month as I can see that you have hundreds of backlinks from suspicious domain names and geolocation, such as Japan.

## Website Health

Website health is excellent. There are no errors.

## Other

In the next month, we are planning to work on your website content. Make a few changes and add new elements, such as the FAQ sections.

## Social Media Management

We publish posts every week on Instagram.
